

Why Does My OBI Home Page Look Different?

You've clicked on Data Warehouse (OBI) in Access Caltech and your home page looks like this:

What happened?

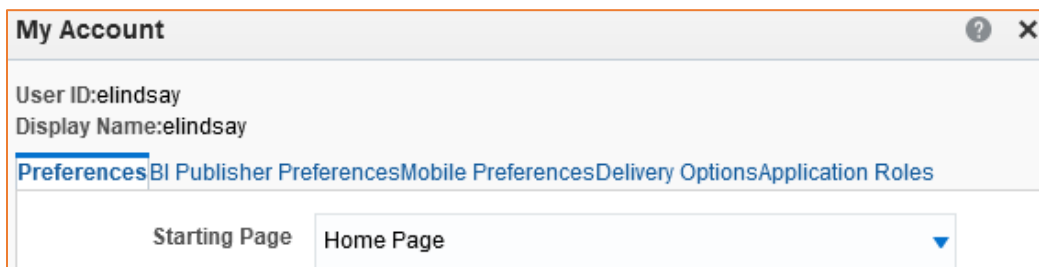

- Your starting home page has been set to the OBI Home Page, and this isn't Caltech's Default home page.

Here is how to update your home page:

- Under your username, select My Account.

- Under the *Preferences* tab, change the *Starting Page* from *Home Page* to *Default*.

- Sign Out of OBI, and then log back in (you must sign out, not just close the browser window).
