

Summary

This query identifies an award sent from PAM that exists in `xxgms_pam_web_service_json` (web service table) but not in Oracle Award Setup. This is a daily scheduled query.

Description

1. When awards are activated in PAM, the JSON is sent to `pam.xxpam_web_service_json@HRSGRANTS`. This is an intermediary table.
2. PAM awards are inserted from `pam.xxpam_web_service_json@HRSGRANTS` into `apps.xxgms_pam_web_service_json` and `citgms_award_setup_mir` when the *Search* button is selected on the Award Setup Search page. The Search button trigger inserts all awards in `pam.xxpam_web_service_json@HRSGRANTS` that are not in `xxgms_pam_web_service_json` (not just the Award the user is searching for on the Award Setup Search page).

Creation Date From **To**

Created By

3. There will never be an award in `xxgms_pam_web_service_json` with a null `PTA_SETUP_STATUS`. The award is loaded to `xxgms_pam_web_service_json` and `citgms_award_setup_mir` at the same time from `pam.xxpam_web_service_json@HRSGRANTS`. The `PTA_SETUP_STATUS` will be Success or Error.
4. *Ora-GA: Awd in PAM WS but not Awd Setup* will let us know if the `AWARD_PTA_SETUP_ID` exists in `xxgms_pam_web_service_json` but not in `citgms_award_setup_mir`, meaning the user has deleted the award in Oracle PTA Setup.

What Needs to be Done?

This is what the email notification looks like:

The following award(s) exist in the PAM web service table but not in Oracle Award setup.

PAM AWD #	SETUP STATUS	ORG	CONTACT
AWD00000031	Success: 20-FEB-2026 10:33	Planetary Sciences Department	Petty,Stephanie
AWD00000004	Success: 19-DEC-2025 10:48	Applied Physics & Materials Science Dept	Fong,Winnie
AWD00000012	Success: 15-JAN-2026 17:36	HSS Division Administration	Lin, Yi Chuang

When the email notification is generated, notify the Administrative Contact listed in the email and run the *CITGMS Reset PTA Setup Status in PAM Web Service Table* program. Enter the PAM Awd # in the Huron Award Number parameter. This will reset the *Award PTA Setup ID* to the default so it can be interfaced with Oracle Award Setup.

CIT PTA Management > Other > Run Requests > CITGMS Reset PTA Setup Status in PAM Web Service Table.
