Week 1 | Microsoft 365 Copilot in Practice

A demo-led introduction to using Copilot effectively and securely across Microsoft 365.

Tuesday, December 1, 2026

10:00 AM – 1:00 PM

1. **Copilot foundations**
   What Copilot is, how it works, and how it protects data.

2. **Live demos across Microsoft 365**
   Outlook, Teams, Word, Excel, and PowerPoint scenarios.

3. **Prompting that gets better results**
   Structure and revise prompts using practical examples.

4. **A day in the life + resources**
   Faculty, research administration, IT demos, Q&A, and guides.

What participants will leave with

Practical skills and reusable resources for day-to-day work.

1 Practical Copilot skills

Use Copilot across core Microsoft 365 applications and understand when Copilot Chat vs. Microsoft 365 Copilot fits.

2 Stronger prompting

Structure prompts, refine results, and apply realistic scenarios relevant to faculty and staff.

3 Agent-building foundations

Understand agent types, Researcher and Analyst, Agent Builder, SharePoint grounding, and responsible use.

4 Take-home resources

Curated prompt guide • use-case summary • next steps
